

STREET REHABILITATION

Project Name: 2002 Main Street Rehabilitation and Beautification
Project Location: Columbia, SC
Client: City of Columbia, SC
Approximate Cost: \$5 Million

SCOPE OF WORK

Principals from InSite Group acted as lead members of the design and construction management team that completed the rehabilitation of 15 blocks of Main Street in Columbia, SC. Planning for the rehabilitation included a comprehensive traffic management plan and service interruption countermeasures designed to minimize impact to traffic patterns and commerce in the local area. Extensive project sequencing planning helped ensure plan performance.

All of the site utilities were upgraded to ensure improvements in stormwater management. Sewer and water lines were relocated and upgraded where necessary. Lighting, visibility and ascetics were improved through underground utility relocations. The project entailed extensive use of planters and stamped

concrete to improve visual impacts of infrastructure.

Project Name: 2002 Lady Street Rehabilitation and Beautification
Project Location: Columbia, SC
Client: City of Columbia, SC
Approximate Cost: \$3 Million

SCOPE OF WORK

Members of InSite worked as integral team members on the project to complete a rehabilitation of 5 blocks of Lady Street in Columbia, SC. The project was designed to improve the visual impacts of the roadway and streetscape while simultaneously improving the existing utilities and upgrading to subsurface utilities.

This project was completed in a very congested and busy transportation corridor. The improvements were completed with excellent cost and schedule performance and created a minimum of disruption to the local community and merchants. The project entailed extensive use of planters and stamped concrete to improve visual impacts of infrastructure.
